

ARDUINO MULTITOOL

3-in-1 tuner, note player, &
metronome

**TIRED OF THE
CUMBERSOME SEARCH
FOR MUSIC HELP?**

**WISHING YOU HAD ALL
YOUR MUSICAL DEVICES
IN ONE PLACE?**

**PRESS THE ON/OFF BUTTON
TO START, AND TOOL BUTTON
TO SWITCH TOOL MODES**

NOTE PLAYER

Use the up and down buttons to cycle through notes on a chromatic scale. The current note being played should display on the screen

METRONOME

Use the up and down buttons to change your tempo by intervals of 5. The current tempo should display on the screen

**Try using a note player or
metronome on your phone to
check our tool!**

TUNER

Use the instrument button to change the instrument you're tuning--we currently support guitar and violin

Use the up and down buttons to cycle through notes you want to tune to, displayed at the top right corner. Then, play your note and adjust your instrument until the LCD screen displays the correct accuracy bar (small two middle bars)
